- ensure injections are only administered to Athletes within Weightlifting as part of appropriate medical treatment;
- ensure Medications are used lawfully and appropriately;
- ensure Weightlifting establishes a best practice approach and documented procedure for the use of Supplements, with a focus on safety and evidence-based use, given the risk that Supplements may contain substances included on the Prohibited List;

Appendix A: Best Practice Principles

1. Sport science and sport medicine personnel

Relevant Organisations should, in the sports science and sports medicine fields:

- (a) where an individual will be working with Relevant Athletes in the sports science and medicine fields, only employ or engage individuals who:
 - i. comply with the [AIS Sports Science Sports Medicine Practitioner Minimum Standards](#); or
 - ii. are registered with the Australian Health Practitioners Regulation Agency (for example as a Chiropractor, Nurse, Osteopath or Paramedic),

and do not have current restrictions in place on their practice;
- (b) employ or engage such individuals under a written document, which must incorporate compliance with the [AIS Sports Science Sports Medicine Practitioner Minimum Standards](#) as an obligation imposed on the relevant individual; and
- (c) ensure that educational or vocational qualifications, or applicable professional registrations, of all such individuals are verified, checked and recorded on commencement and at the expiry/renewal of a specific requirement.

2. Medication

- (a) Relevant Athletes should refer to the [Global DRO website](#) or the Sport Integrity Australia App to assist them to determine whether Medications (prescription and non-prescription) are permitted for use in sport, have conditions associated with their use in sport or are prohibited. Medications with conditions or which are prohibited may be able to be taken if a TUE is sought and granted.
- (b) The Relevant Organisation should direct all Relevant Athletes to determine if they need an in-advance or retroactive TUE by referring to the [Sport Integrity Australia website](#) or App. Once determined, the Relevant Athlete should comply with the relevant requirements.
- (c) Relevant Athletes should notify the Chief Medical Officer or person nominated by the Relevant Organisation when Medications have been provided/prescribed by a Medical Practitioner not appointed by the Relevant Organisation.
- (d) Relevant Athletes should not use expired Medication.

3. Injections

- (a) Relevant Organisations should maintain a self-injection register.
- (b) Relevant Personnel or Relevant Athletes with a documented medical condition requiring the possession of injection equipment should notify the Chief Medical Officer or nominated person of their medical authority to inject, and subsequently be listed on the Relevant Organisation self-injection register.
- (c) If a self-injection register is maintained, in exceptional circumstances (such as insufficient time or opportunity), retrospective approval of possession of injection equipment and self-injection may be granted at the discretion of the Relevant Organisation.

4. Supplements

- (a) No supplement is free from anti-doping risk. In particular, Prohibited Supplements present a risk to athlete health and integrity and may also lead to a breach of a relevant anti-doping policy.
- (b) Australian Weightlifting Federation recognises that Dietary Supplements may be taken by Relevant Athletes and is committed to establishing a best practice approach and documented procedure for the use of Supplements, with a focus on safety and evidence-based use, given the risk that Supplements may contain substances included on the Prohibited List.
- (c) Australian Weightlifting Federation acknowledges the value of accredited third-party auditing programs to reduce the risk of Supplements containing substances included on the Prohibited List. Australian Weightlifting Federation warns that there is no guarantee that any Supplement is free from prohibited substances, despite any claims made by Supplement manufacturers or clearance by third party auditing companies.
- (d) Australian Weightlifting Federation adopts the [AIS Sport Supplement Framework](#), which classifies Supplements into four categories according to their effectiveness, safety and current status on the Prohibited List.
- (e) Supplements should only be used by Relevant Athletes in accordance with:

- i. this Policy; and
- ii. any documented requirements for the use of Supplements, as adopted by the Relevant Organisation from time to time.
